Department of Computer Science & Engineering

<u>Vision</u>

To bring forth cultured graduates meeting the expectation of national and multi-national industries exceling in the field of computing as well as in higher studies and research.

Mission

- 1. To provide strong theoretical knowledge of computer science with practical training which meets the industries expectations.
- 2. To train necessary skills to further higher studies and professional growth.
- 3. To inculcate ethical valued in graduates through various social-cultural activities.

Program Educational Objectives (PEOs)

- **PEO 1:** Students will be able to effectively communicate, understand the problems of industries, environment, society and endeavor to find the solutions with high ethical responsibilities.
- **PEO 2:** Students will be able to engage in life-long learning, pursue higher studies and contribute to the evolving research & development.
- **PEO 3:** Students will be able to demonstrate their professional skills and leadership roles across multi-disciplinary domains.

Program Specific Outcomes (PSOs)

- **PSO 1:** Students should be able to develop and test sustainable cost effective software for automization in businees application and society.
- **PSO 2:** Students should be able to use new technologies and tools for executing multidisciplinary projects.

Program Outcomes (POs)

PO 1: Engineering Knowledge : An ability to apply knowledge of computing and mathematics which is appropriate to computer science.

PO 2: Problem analysis: An ability to identify, formulate, and develop solutions to computational challenges.

PO 3: Design/development of solutions: An ability to design, implement, and evaluate a computational system to meet the desired solutions of problem with feasibility.

PO 4: Conduct investigations of complex problems: Use research-based knowledge and methods including design of experiments, analysis and interpretation of data, and synthesis them to get the valid conclusions.

PO 5: Modern tool usage: An ability to use appropriate techniques, skills, and tools necessary for computing practice and makes human effort less.

PO 6: The engineer and society: An ability to analyze impacts of computing on individuals, organizations, and society.

PO 7: Environment and sustainability: Understand the impact of the professional engineering solutions on society in environmental contexts, and provide a solution for sustainable development.

PO 8: Ethics: An understanding of professional, ethical, legal, security, and social issues and responsibilities for the computing profession.

PO 9: Individual and team work: An ability to function effectively on teams to accomplish shared idea, computing design, evaluation, or implementation goals.

PO 10: Communication: An ability to communicate and engage effectively with diverse stakeholders.

PO 11: Project management and finance: An ability to apply design and development principles in the construction of software systems of varying complexity.

PO 12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Course Objectives

- This course provides an introduction to **Object Oriented Programming** (**OOP**) using the **C++** programming language.
 - Its main objective is to teach the basic concepts and techniques which form the **object oriented programming paradigm.**
- Students completing the course should know:
 - The model of object oriented programming: abstract data types, encapsulation, inheritance and polymorphism.
 - **Fundamental features** of an object oriented language like Java: **object classes** and **interfaces, exceptions** and libraries of **object collections.**
 - How to take the statement of a business problem and from this determine **suitable logic for solving the problem;** then be able to proceed to code that logic as a program written in Java.
 - How to **test, document** and **prepare** a professional looking package for each business project.

Object-Oriented Programming Learning Outcomes

On completion of the course students should be able to:

| Understand the features of C++ supporting object oriented programming |
|--|
| Understand the relative merits of C++ as an object oriented programming language |
| Understand how to produce object-oriented software using C++ |
| Understand how to apply the major object-oriented concepts to implement object oriented programs in C++, encapsulation, inheritance and polymorphism |
| Understand advanced features of C++ specifically stream I/O, templates and operator overloading |

7. Syllabus

7A. 05 1301 OBJECT ORIENTED PROGRAMMING

L- T- P: 3-0-3

Credit : 5

1. Introduction to C++ : Object Oriented Technology, Advantages of OOP, Input- output in C++, Tokens, Keywords, Identifiers, Data Types C++, Derives data types. The void data type, Type Modifiers, Typecasting, Constant, Operator, Precedence of Operators, Strings. Lecture : 3

2. Control Structures: Decision making statements like if-else, Nested if-else, goto, break, continue, switch case, Loop statement like for loop, nested for loop, while loop, do-while loop. Lecture : 3

3. Functions : Parts of Function, User- defined Functions, Value- Returning Functions, void Functions, Value Parameters, Function overloading, Virtual Functions. Lecture : 3

4. Classes and Data Abstraction : Structure in C++, Class, Build- in Operations on Classes, Assignment Operator and Classes, Class Scope, Reference parameters and Class Objects (Variables), Member functions, Accessor and Mutator Functions, Constructors, default Constructor, Destructors. Lecture : 15

5. Overloading & Templates : Operator Overloading, Function Overloading, Function Templates, Class Templates. Lecture : 5

6. Inheritance : Single and Multiple Inheritance, virtual Base class, Abstract Class, Pointer and Inheritance, Overloading Member Function. Lecture : 5

7. Pointers and Arrays : Void Pointers, Pointer to Class, Pointer to Object, The this Pointer, Void Pointer, Arrays. Lecture : 6

8. Exception Handling : The keywords try, throw and catch. Creating own Exception Classes, Exception Handling Techniques (Terminate the Program, Fix the Error and Continue, Log the Error and Continue), Stack Unwinding. Lecture : 5

Text Books :

- 1. Thinking in C++, Volume 1 & 2 by Bruce Eckel, Chuck Allison, Pearson Education
- 2. Mastering C++, 1/e by Venugopal, Tata McGraw Hill.
- 3. Object Oriented Programming with C++, 3/e by E. Balaguruswamy, Tata McGraw Hill.
- 4. Starting Out with Object Oriented Programming in C++, by Tony Gaddis, Wiley India.

Reference Books :

- 1. The C++ Programming language 3/e by Bjarne Stroustrup, Pearson Education.
- 2. C++, How to Programme, 4e, by Deitel, Pearson Education.
- 3. Big C++ by Cay Horstmann, Wiley India.
- 4. C++ Primer, 3e by Stanley B. Lippmann, Josee Lajoie, Pearson Education.
- 5. C++ and Object Oriented Programming Paradigm, 2e by Debasish Jana, PHI.
- 6. Programming with C++, 2/e by Ravichandran, Tata McGraw Hill.
- 7. C++ Programming Black Book by Steven Holzner, Dreamtech Press.

7B. GATE Syllabus

1. <u>Scope and Objectives of the Course</u>

This course is designed as an entry level programming course for students who have prior programming experience. This course introduces the concepts of object-oriented programming to students with a background in the procedural paradigm. The course begins with a brief review of control structures and data types with emphasis on structured data types and array processing. It then moves on to introduce the object-oriented programming paradigm, focusing on the definition and use of classes along with the fundamentals of object-oriented design. Other topics include an overview of programming language principles, simple analysis of algorithms, basic searching and sorting techniques. Brief review of control structures, functions, and primitive data types - Object-oriented programming: Object-oriented design; encapsulation and information-hiding; separation of behaviour and implementation; classes, subclasses, and inheritance; polymorphism; class hierarchies. Later on it also introduces the concept of pointers and exception handling.

2. <u>Textbooks</u>

TB1: Object Oriented Programming with C++, 3/e by E. Balaguruswamy, Tata McGraw Hill.

TB2: Thinking in C++, Volume 1 & 2 by Bruce Eckel, Chuck Allison, Pearson Education

TB3: Mastering C++, 1/e by Venugopal, TataMcGraw Hill.

TB4: Starting Out with Object Oriented Programming in C++, by Tony Gaddis, Wiley India.

3. <u>Reference Books</u>

RB1: The C++ Programming language 3/e by Bjarne Stroustrup, Pearson Education.

- **RB2:** C++, How to Programme, 4e, by Deitel, Pearson Education.
- **RB3:** Big C++ by Cay Horstmann, Wiley India.
- RB4: C++ Primer, 3e by Stanley B. Lippmann, Josee Lajoie, Pearson Education.
- **RB5:** C++ and Object Oriented Programming Paradigm, 2e by Debasish Jana, PHI.
- **RB6:** Programming with C++, 2/e by Ravichandran, Tata McGraw Hill.
- **RB7:** C++ Programming Black Book by Steven Holzner, Dreamtech Press.

|-------------|-----------------------|----|
| Component 2 | Assignment Evaluation | 10 |

| Component 3** | End Term Examination** | 70 |
|---------------|------------------------|-----|
| | Total | 100 |

** The End Term Comprehensive examination will be held at the end of semester. The mandatory requirement of 75% attendance in all theory classes is to be met for being eligible to appear in this component.

<u>SYLLABUS</u>

| Topics | No of lectures |
|---|----------------|
| Introduction to C++ : Object Oriented Technology, Advantages of OOP, | 3 |
| Input-output in C++, Tokens, Keywords, Identifiers, Data Types C++, | |
| Derives data types. The void data type, Type Modifiers, Typecasting, | |
| Constant, Operator, Precedence of Operators, Strings. | |
| Control Structures : Decision making statements like if-else, Nested if-else, | 3 |
| goto, break, continue, switch case, Loop statement like for loop, nested for | |
| loop, while loop, do-while loop. | |
| Functions : Parts of Function, User-defined Functions, Value-Returning | 3 |
| Functions, void Functions, Value Parameters, Function overloading, Virtual | |
| Functions. | |
| Classes and Data Abstraction : Structure in C++, Class, Build-in Operations | 15 |
| on Classes, Assignment Operator and Classes, Class Scope, Reference | |
| parameters and Class Objects (Variables), Member functions, Accessor and | |
| Mutator Functions, Constructors, default Constructor, Destructors. | |
| Overloading & Templates : Operator Overloading, Function Overloading, | 5 |
| Function Templates, Class Templates. | |
| Inheritance : Single and Multiple Inheritance, virtual Base class, Abstract | 5 |
| Class, Pointer and Inheritance, Overloading Member Function. | |
| Pointers and Arrays : Void Pointers, Pointer to Class, Pointer to Object, | 6 |
| The this Pointer, Void Pointer, Arrays. | |
| Exception Handling : The keywords try, throw and catch. Creating own | 5 |
| Exception Classes, Exception Handling Techniques (Terminate the | |
| Program, Fix the Error and Continue, Log the Error and Continue), Stack | |
| Unwinding. | |

Evaluation and Examination Blue Print:

Internal assessment is done through quiz tests, presentations, assignments and project work. Evaluation is a very transparent process and the answer sheets of sessional tests, internal assessment assignments are returned back to the

students.

The components of evaluations along with their weightage followed by the University is given below

| Mid sem | 20% |
|---------------------------------|-----|
| Assignments/Quiz Tests/Seminars | 10% |
| End term examination | 70% |

<u>11. Lecture plan</u>

Unit I :

Objective:

The student should be able to define classes and objects. The student should make himself conversant with function overloading and he should be able to understand the need for polymorphism and encapsulation.

| Session No | Topics to be covered | Time Mts | Ref (Page No) | Teaching Method |
|---------------|---|----------|---------------------|--------------------|
| 1 | OOP concepts | 50 | 1(2-3) | BB |
| 2 | Objects, classes, methods and messages | 50 | 1(4-5) | BB |
| 3 | Abstraction and encapsulation | 50 | 1(6-8) | BB |
| 4 | Inheritance | 50 | 1(9) | BB |
| 5 | Abstract classes, polymorphism. Introduction to C++, classes – access specifiers, function and data members | 50 | 1(48-58) | BB |
| 6 | Default arguments, function overloading, friend functions | 50 | 1(119-122, 127-135) | BB |
| 7. | const and volatile functions, static members | 50 | 1(135-139) | BB |
| 8 | Pointers and objects, constant objects | 50 | 1(79-82, 90-92) | BB |
| 9 | Nested classes, local classes | 50 | 1(82-88) | BB |

Unit II:

Constructors – Default constructor – Parameterized constructors – Constructor with dynamic allocation – Copy constructor – Destructors – Operator overloading – Overloading through friend functions – Overloading the assignment operator – Type conversion – Explicit constructor.

| Session | | | | Teaching |
|---------|----------------------|-------------|--------------|----------|
| No | Topics to be covered | Time Mts | Ref(Page No) | Method |

9

| 10 | Constructors - default constructor | 50 | 1(170-179) | BB |
|----|--|----|------------|----|
| 11 | Parameterized constructors, constructors with dynamic allocation | 50 | 1(183-199) | BB |
| 12 | Copy constructor | 50 | 1(199-207) | BB |
| 13 | Destructors | 50 | 1(217-226) | BB |
| 14 | Operator overloading | 50 | 1(232-246) | BB |
| 15 | Overloading through friend functions | 50 | 1(246-251) | BB |
| 16 | Overloading the assignment operator | 50 | 1(251-255) | BB |
| 17 | Type conversion | 50 | 1(269-280) | BB |
| 18 | Explicit constructor | 50 | 1(181-183) | BB |

Objective: The student should get in depth knowledge of constructor and operator overloading.

Unit III:

Function and class templates – Exception handling – Try-catch-throw paradigm – Exception specification – Terminate and unexpected functions – Uncaught exception.

Objective: The student should be able to comprehend the need for templates and exception handling.

| Session No. | Topics to be covered Time For the State of t | | Ref(Page No) | Teaching Method |
|----------------|--|----|--------------|--------------------|
| 19 | Function template | 50 | 1(285-313) | BB |
| 20 | Function template | 50 | | BB |
| 21 | Class template | 50 | 1(315-337) | BB |

| 22 | Class template | | | BB |
|----|------------------------------------|----|------------|----|
| 23 | 3 Exception handling | | 1(342-345) | BB |
| 24 | Try-catch-throw paradigm | 50 | 1(345-358) | BB |
| 25 | Exception specification | 50 | 1(358-366) | BB |
| 26 | Terminate and unexpected functions | 50 | 1(369-373) | BB |
| 27 | Uncaught exception | 50 | 1(373-376) | BB |

Unit IV:

9

 $\label{eq:interval} \begin{array}{l} \mbox{Inheritance} - \mbox{Public} - \mbox{Private} \mbox{ and protected derivations} - \mbox{Multiple inheritance} - \mbox{Virtual base class} - \mbox{Abstract class} - \mbox{Composite objects runtime polymorphism} - \mbox{Virtual functions} - \mbox{Pure virtual functions} - \mbox{RTTI} - \mbox{Typeid} - \mbox{Dynamic casting} - \mbox{RTTI} \mbox{and templates} - \mbox{Cross casting} - \mbox{Down casting} \ . \end{array}$

Objective: The student should be able to discriminate between different types of inheritance.

| Session No | Topics to be covered | Time Mts | Ref(Page No) | Teaching Method |
|---------------|--|-------------|--------------|--------------------|
| 28 | Inheritance – public, private, and protected derivations | 50 | 1(384-400) | BB |
| 29 | Multiple inheritance | 50 | 1(400-405) | BB |
| 30 | Virtual base class, abstract class | 50 | 1(407-412) | BB |
| 31 | Composite objects | 50 | 1(415-423) | BB |
| 32 | Virtual functions – pure virtual functions | 50 | 1(436-455) | BB |
| 33 | RTTI – type id | 50 | 1(459-472) | BB |
| 34 | Dynamic casting | 50 | 1(472-482) | BB |
| 35 | RTTI and templates | 50 | 1(484-490) | BB |
| 36 | cross casting, down casting . | 50 | 1(490-492) | BB |

Unit V:

Streams and formatted I/O – I/O manipulators – File handling – Random access – Object serialization – Namespaces – STD namespace – ANSI string objects – Standard template library.

Objective: The student should be able to gain in-depth knowledge of files and namespaces

| Session | | | | Teaching |
|---------|---------------------------|------|--------------|----------|
| No | Topics to be covered | Time | Ref(Page No) | Method |
| | | Mts | | |
| 37 | Streams | 50 | 1(496-500) | BB |
| 38 | Formatted I/O | 50 | 1(500-515) | BB |
| 39 | I/O manipulators | 50 | 1(515-526) | BB |
| 40 | File handling | 50 | 1(530-543) | BB |
| 41 | Random access | 50 | 1(544-551) | BB |
| 42 | Object serialization | 50 | 1(551-552) | BB |
| 43 | Namespaces, std namespace | 50 | 1(558-573) | BB |
| 44 | ANSI String Objects | 50 | 1(577-586) | BB |
| 45 | Standard template library | 50 | 1(588-630) | BB |

12. Assignments

<u>Assignment – 1</u>

Object Oriented Programming

Q.1. What do you mean by Software crisis?

Q.2. a) What is the Procedure oriented Programming?

b) What are its main Characteristics?

- Q.3. Write a program to sum of digits of given integer number.
- Q.4. Define Tokens and describe its types.
- Q.5. What are the data type in C++?

<u>Assignment – 2</u>

Object Oriented Programming

- Q.1. Define control Structure and its types?
- Q.2. a) What is the function prototyping?
 - b) What are constructors and destructors?

Q.3. Write a c++ program to find area of circle, triangle and rectangle. Use function overloading concept.

Q.4. Define a class to represent a bank account. Include the foll members:

Data Members: 1) Name of depositor

- 2) Account number
- 3) Type of account
- 4) Balance amount in the account
- Member Functions: 1) to assign initial values
- 2) To deposit an amount
- 3) To withdraw amount after checking the balance4) To display name and balance

13. <u>Having No Tutorial !</u>

14. Sessional Question Papers

Darbhanga College of Engineering, Darbhanga

Department of Computer Science and Engineering Mid-Semester Examination 2018 CIVIL & MECHANICAL

Course:- Object Oriented Programming (051401)Semester:- 4th Sem, ME & CEMarks:- 20Time Allowed:- 2 Hour

Information for You

1. This Examination paper contains **5-Questions** each of **5-Marks**.

2. Attempt any 4-Questions. Question - 5 is compulsory.

Advices to you

- 1. You should write your answers clearly in your own words.
- 2. Draw the figures whenever it is required.
- **1.** Define and write the syntax for the following :

| a) | If | Statement | d). sw | itch | Statement |
|----|----|-----------|--------|------|-----------|
|----|----|-----------|--------|------|-----------|

- b) Void Function e). main() Statement
- c) for Statement

Or,

- 1.1). Why the concept of data type is used in the C++ programming?
- 1.2). How is the data type classified under various categories in OOPs?

2. Differentiate between the following:

- a) Object Oriented Programming & Procedure Oriented Programming .
- b) while loop Statement & do-while loop Statement.

| 3. | a). What do you mean by function prototyping? | 2 |
|----|--|---|
| | b). Write a C++ program to show the use of function prototyping. | 3 |

4. a). Write a C++ program to implement the mathematical operations addition, subtraction, multiplication and division. Take the input from the user . 3
b). What is the use of user define function in programming? How it is defined? 2

5. Write a C++ program to print the two integers given by user as shown in example_fig.- OOPs using concept of function calling.

| 9 |
|---|
| 6 |
| 9 |
| 6 |
| |

Example_fig.- OOPs

21. Result Analysis

22. Lab Course

| Institute / School Name | Darbhanga College Of Enginee | ring | |
|-------------------------|--|----------------|---|
| Program Name | B.Tech. | | |
| Course Code | 051401 | | |
| Course Name | Object Oriented Programming | Lab | |
| Labs (per week) | 3 hours | Course Credits | 2 |
| Course Coordinator Name | Mr. DHIRENDRA KUMAR (4 TH S | SEM CIVIL) | |

4. <u>Scope and Objectives of the Course</u>

<u>The purpose of this lab is to give the students an understanding of object oriented concepts as well as make</u> students program in c++.

5. <u>Reference Books</u>

RB1: FIT Lab Manual

6. Lab Plan

| S. No. | Experiment Detail |
|--------|--|
| 1 | Write a C program to find sum, difference, division and multiplication of two numbers. |
| 2 | Write a C program to swap two no. without using 3 rd variable. |
| 3 | Write a C program to check whether a number is prime or not. |
| 4 | Write a C program to find factorial of a number. |

5. Programs on concepts of classes and objects.

6. Programs using inheritance.

i. Single inheritance

- ii. Multiple inheritance
 - 1. Multi-level inheritance
 - 2. Use of virtual base classes
- 7. Programs using static polymorphism.
 - i. Function overloading
 - ii. Ambiguities while dealing with function overloading
- 8. Programs on dynamic polymorphism.
 - i. Use of virtual functions

- ii. Use of abstract base classes
- 9. Programs on operator overloading.
 - i. Operator overloading using member operator functions.
 - ii. Operator overloading using non-member operator functions.
 - iii. Advantages of using non-member operator functions.
- 10. Programs on dynamic memory management using new, delete operators.
- 11. Programs on copy constructor and usage of assignment operator.
- 12. Programs on exception handling.

2. Evaluation Scheme:

| Component 1* | Lab Performance / File work/Internal viva | 20 |
|---------------|---|----|
| Component 3** | End Term | 30 |
| | total | 50 |

*Lab Performance will be evaluated weekly

**The End Term examination for practical courses is held at the end of semester and includes conduct of experiment and an oral examination (viva voce). The mandatory requirement of 75% attendance in all lab classes is to be met for being eligible to appear in this component

23. CO-PO mapping

Object Oriented Programming (Theory)

Course Objectives:

- This course provides an introduction to **Object Oriented Programming (OOP)** using the C++ programming language.
 - 1. Its main objective is to teach the basic concepts and techniques which form the **object oriented programming paradigm.**
 - 2. Student can be able to map a particular real world problem to a particular programming model.

Course Outcome (5):

At the end of this course, the students will be able to

CO1: Differentiate (Analyze 4) between procedure oriented programming and object oriented programming.

CO2: Select (Evaluate 5) the proper tools to visualize the problem in the object oriented programming model.

CO3: Design (Create 6) the class to map the different entities of the problem.

CO4: (Apply 3) the major object-oriented concepts for example, encapsulation, inheritance and polymorphism to implement object oriented programs in C++,.

CO5: (Understand 2) advanced features of C++ specifically stream I/O, templates and operator overloading

| CO/PO /PSO | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 |
|---------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|----------|----------|----------|----------|----------|
| CO1 | 2 | 3 | 2 | 2 | - | - | - | - | - | - | 2 | - | 3 | - |
| CO2 | 2 | 3 | 3 | 2 | - | - | - | - | - | - | - | - | 3 | - |
| CO3 | 2 | 3 | 3 | 3 | - | - | - | - | - | - | - | - | 3 | 2 |

Mapping of COs and POs:

| CO4 | 2 | 2 | 3 | 3 | - | - | - | - | - | - | 2 | - | 2 | - |

| CO5 | 2 | 2 | 2 | 3 | - | - | 2 | - | - | - | - | 2 | - | - |

Mapping of COs and PSOs:

| CO/PSO | PSO1 | PSO2 |
|--------|------|------|
| CO1 | 3 | 0 |
| CO2 | 3 | 0 |
| CO3 | 3 | 2 |
| CO4 | 2 | 0 |
| CO5 | 0 | 0 |

Correlation Level: 1- Slight (Low) 2- moderate (Medium) 3 – Substantial (High)

Object Oriented Programming (Lab)

Course Outcome (3):

At the end of this course, the students will be able to

CO1: (Develop 6) program for basic concept of OOP features and C++ concept.

CO2: (Implement 3) program using unary and binary Operator Overloading and also Develop program using concept of inheritance, polymorphism and Function Overloading.

CO3: (Interpret 2) the concept of abstract class and virtual functions.

Mapping of COs and POs:

| CO/PO | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|-------|-----|-----|-----|-----|-----|-----|------------|-----|------------|------|------|------|
